Research Interests

My research focuses on Digital Humanities, Natural Language Processing and Deep Learning. I am particularly interested in the methods of dissemination, sharing and valorisation of heritage collections through the prism of Digital Humanities in order to track the circulation of knowledge.

Digital Humanities: optical character recognition (OCR), handwritten text recognition (HTR), data structuring in XML-TEI format, publication of queryable digital editions

Natural Language Processing: text mining, computational linguistics

Deep Learning: Transformers Models

Education and Qualifications

- 2021 – **PhD in Digital Humanities**, Sorbonne University, Paris (France), Faculty of Arts, Languages, Literature and Humanities, Doctoral School III “French and Comparative Literature” (ED 019), UMR 8599, CELLF (Center for the Study of French Language and Literature), OBTIC (Observatory of Texts, Ideas and Corpora)
- 2019 – 2024 **Certificate of specialisation in Linguistics**, University of Geneva (Switzerland), Faculty of Humanities, Department of Linguistics
Dissertation title : Analysis of lexical fields in the heritage collection of Jean-Martin Charcot
- 2017 – 2019 **Master in Social Sciences and Computing**, University of Belgrade (Serbia), interdisciplinary study program
Master’s Thesis title: CREATION AND ANALYSIS OF THE YUGOSLAV ROCK SONG LYRICS CORPUS FROM 1945 TO 2003 [[Zenodo](#)]
Abstract: The thesis analyzes, from the theoretical and practical perspective, the creation and processing of corpus of rock songs’ lyrics originating from the former Yugoslavia in the period 1945-2003. The lyrics are obtained from the LyricWiki website using the Python library `lyricsmaster` in the *web scraping* process. The collected texts are then merged into a single XML file and automatically annotated with the `yattag` Python tool. Afterwards, the data preprocessing was conducted at the formal and content level. Furthermore, the XML document is transformed into XHTML format applying XSLT processor, in order to generate basic corpus data. The diacritic restoration process with the “Slovo Majstor” application and morphological electronic dictionaries of Serbian language in the LeXimir software package, is also automated. The *text mining* process encompassed retrieving socio-political and patriotic topics using NLTK library in Python, while romantic and other topics were visualized using the TreeCloud and WordItOut software. The similarity between authors represented in the corpus was measured using `stylo` package in the programming language R. Finally, an overview of the today’s most relevant programming libraries in the field of *natural language processing* is provided, which, at the same time, serves as a guideline for the future work.
Keywords: corpus linguistics, Yugoslav rock and roll, web scraping, natural language processing, text mining.
- 2017 – 2018 **Master in Language, Literature, Culture**, University of Belgrade (Serbia), Faculty of Philology
Master’s Thesis title: USE OF THE MOODLE PLATFORM IN THE REFORMED TEACHING OF NEOHELLENISTIC STUDIES [[Zenodo](#)]
Abstract: This paper deals with the Modern Greek language and literature learning using the Moodle electronic platform within the *hybrid* and *online* learning model. The subject of the discussion are the main features of this teaching method, as well as the application of Moodle in working with the first-year undergraduate students of the Department of Neohellenistic Studies at the Faculty of Philology, University of Belgrade. We examine the effectiveness of the mixed-mode learning by presenting the electronic contents that are available on the online courses *Contemporary Greek Language G-1* and *G-2*, *Greek Literature 1* and *Practicum in Neohellenistics 2*. Special attention is devoted to the analysis of the course interactivity, multimediality, and flexibility. Finally, we also expose the results of the accompanying empirical research, which led to the conclusion that the implementation of Moodle in teaching significantly helps students in learning.

- 2013 – 2017 **Bachelor in Modern Greek language, literature, culture**, *University of Belgrade (Serbia), Faculty of Philology, Department of Neohellenic Studies*
- 2009 – 2013 **Philological High School, Belgrade (Serbia), French class**

Work Experience

The volumes are reported in equivalent TD hours (HETD).

- 2024-2026 ATER (Temporary Teaching and Research Associate), Sorbonne University, UFR Sociology and Computer Science for the Humanities, Bachelor's in Language Sciences and Master's in Language and Computing.

Study Days

- 2025 **STUDY DAY: DIGITAL HUMANITIES AND ARTIFICIAL INTELLIGENCE: INTERACTIONS / ALTERCATIONS** – poster session “Analysis of Jean-Martin Charcot’s Influence through Medical Terminology Extraction: a *PatternRank* Approach”. Study day launching the Digital Humanities Initiative of Sorbonne University. Maison de la recherche, Paris (France), 7th November 2025.
- 2025 **STUDY DAY OF THE ARIANE CONSORTIUM (WG4)** “AI-Assisted Literary Analysis” – “...”, organised by the **ARIANE Consortium**. SCAI, Paris (France), 17 June 2025.
- 2024 **ARTIFICIAL INTELLIGENCE AND DIGITAL HUMANITIES** – “Measuring Charcot’s Influence on his Contemporaries Using Keyphrase Extraction”. Study day organized under the aegis of the French Association for Artificial Intelligence (AFIA), and the RG CNRS MADICS and MAGIS, National Library of France, Paris (France), 3rd May 2024.
- 2023 **Background noise or added value? Managing noise during computer processing of linguistic corpora** – co-organised by the University of Grenoble Alpes and Roma La Sapienza, House of Languages and Cultures, University Grenoble Alpes, Grenoble (France), 28th April 2023 [[link](#)].
- 2023 **Digital Humanities Study Day at Sorbonne University** – 1st study day on Digital Humanities, Maison de la recherche, Paris (France), 18th January 2023 [[link](#)].
- 2022 **RobusTAL22** – 1st study day on the robustness of the NLP systems, Maison de la recherche, Paris (France), 25th November 2022 [[link](#)].

Congresses

- 2018 **DH2023** : International Conference “DH2023 – Collaboration as Opportunity”, University of Graz | Messe Congress Graz, Graz (Austria), 10th–14th July 2023 [[link](#)].
- 2018 **ALT 6**: 6th International Congress “Primenjena lingvistika danas – jezik, književnost i interdisciplinarnost” (“Applied Linguistics Today 6 – Language, Literature and Interdisciplinarity”), Faculty of Philology, Belgrade (Serbia), 12th–13th October 2018 [[link](#)].

Seminars

- 2026 **Seminar of the “Linguistic Variation and Computational Linguistics” team**, organised by Dr Gaël Lejeune, “Tracing the circulation of concepts in noisy heritage corpora: contributions and limits of automatic tools using the Jean-Martin Charcot collection”. 11th June 2026, Maison de la Recherche, Paris (France).
- 2025 **ObTIC Team Doctoral Seminar**, SCAI, Paris (France). Seminar organised by Prof. Dr Glenn Roe and Dr Motasem Alrahabi.
- “Measuring the Impact of Jean-Martin Charcot *via* the Extraction of Medical Terms: Which Approach to Adopt?”, 6th February 2025.
 - “Comparison of Keyphrase Extraction Approaches”, 13th March 2025.
 - “Keyphrase Extraction from the Charcot Corpus: Quantitative and Qualitative Evaluation”, 15th April 2025.
- 2024 **Seminar of the “Computational Linguistics – Speed Dating” team**, organised by Dr Gaël Lejeune, “Origins and Progress of the Project Charcot”. 12th September 2024, Maison de la Recherche, Paris (France).
- 2024 **PhD Seminar/Workshop on HTR and eScriptorium**, organised by Centre Roland Mousnier of the Faculty of Arts, Languages, Literature and Humanities, Sorbonne University, Feedback Session, 26th April 2024, Centre Roland Mousnier (France).

- 2024 [PhD Seminar of the Service Unit Center for Experimentation in Digital Methods for Research in the Humanities and Social Sciences \(Centre d'Expérimentation en Méthodes Numériques pour les Recherches en Sciences Humaines et Sociales\) CERES](#), “[Approches des méthodes numériques](#)” – “[Dans les petits papiers de Charcot : de l'expérimentation aux prémisses de la neurologie moderne](#)”. Séminaire organisé par Léa Andolfi, Julien Bezançon, Clara Bordier, Thibault Grison, Rimane Karam, Adélie Laruncet et Marine Tiger, 27 mars 2024, Maison de la Recherche, Paris (France).
- 2023 **Seminar for Master's students, “Literary Digital Humanities”**, organised by Prof. Dr Glenn Roe, “Circulation of the Jean-Martin Charcot's medical discourse: first observations”, 6th December 2023, Maison de la Recherche, Paris (France) [[link](#)].
- 2023 **Doctoral seminar/workshop on OCR and HTR**, organised by Centre Roland Mousnier of the Faculty of Arts, Languages, Literature and Humanities, Sorbonne University, “Digitisation of documents transcription, annotation, OCR, HTR, correction...”, with Dr Motasem Alrahabi, 22th November 2023, Maison de la Recherche, Paris (France) [[link](#)].
- 2023 **Seminar of the “Computational Linguistics” team**, organised by Dr Gaël Lejeune, “Automatic correction of OCR interferences in the recognition of spatial named entities: real gain or loss of information?”, 13th April 2023, Maison de la Recherche, Paris (France) [[link](#)].
- 2022 **Seminar “Literary Digital Humanities”**, organised by Prof. Dr Glenn Roe, “Impact of automatic correction of the OCR/HTR on the named entity recognition task in noisy corpora”, 16th November 2022, Maison de la Recherche, Paris (France) [[link](#)].
- 2021 **JeRTeh**, “Katabase : In Search of Lost Manuscripts”, organised by JERTEH, Language Resources and Technologies Society in Belgrade (Društvo za Jezičke Resurse i Tehnologije, Beograd), 10th June 2021, Belgrade (Serbia) [en ligne] [[link](#)].

Workshops

- 2024 [Python Workshop](#) – “[Keyphrase Extraction from the Charcot collection](#)”, organised by the team-project OBTIC, 30th April 2024, DataLab, National Library of France, Paris (France).
- 2023 – [ANHIMO Workshop](#), “[Use of the Automatic Text Transcription Techniques for the Analysis of Typed Maritime Documents of the XXth c.](#)”, Summer School of Numerical Analysis of the History of the Sea and Oceans (ANHIMO 2023), dedicated to numerical analysis of the History of the Sea and Oceans and organised by the Ocean Institute of Sorbonne University Alliance and Sorbonne Centre for Artificial Intelligence (SCAI), Paris (France), 26th-30th June 2023.
- 2021 **Python Workshop**, “Handling text files”, organised by the team-project OBTIC, 5th December 2021, Paris (France) [[link](#)].
- 2021 **OCR Workshop**, “Automatic correction of the OCR output”, organised by the team-project OBTIC, 25th November 2021, Paris (France) [[link](#)].
- 2021 **OCR Workshop**, “Transkribus, Kraken, eScriptorium, Tesseract”, organised by the team-project OBTIC, 18th November 2021, Paris (France), with Johanna Cordova [[link](#)].
- 2021 **OCR Workshop**, “Presentation and use of OCR/HTR tools: Abbyy FineReader, Transkribus, Kraken and eScriptorium”, organised by team-project OBTIC, 28th October 2021, Paris (France), with Dr Motasem Alrahabi [[link](#)].

Co-supervision of Master's Thesis

- 2025 Camille Fief & Yeleen Canonge (M1 – Sorbonne University) : “**Reconnaissance d’entités nommées et entraînement de modèle sur données bruitées**” (“Named Entity Recognition and Model Training on Noisy Data”), with Gaël Lejeune and Caroline Koudoro-Parfait.
- 2025 Ruixing Zheng et Marina Carvalho Lopes (M1 – Sorbonne University) : “**Reconnaissance d’Entités Nommées sur un corpus de poèmes du 19^e siècle**” (“Named Entity Recognition on a Corpus of 19th Century Poems”), with Gaël Lejeune and Caroline Koudoro-Parfait.

Extracurricular Activities

- 2025 [DFC] **ETHICS OF SCIENTIFIC RESEARCH**, organised by Sorbonne University, Campus Cordeliers, Sorbonne University, Paris (France) [participation : in person] [**certificate of attendance**].
- 2023 “Summer School on Digital Humanities”, as part of the strategic alliance between National Autonomous University of Mexico (UNAM) and Sorbonne Center for Artificial Intelligence (SCAI). Applied Mathematics and Systems Research Institute (IIMAS), Mexico City, Mexico [**certificate of attendance**].
- 2022 EnExDi (*Encoder, Exploiter, Diffuser*) – “Digital humanities in research projects”, intensive training school in digital humanities, The House of the Humanities and Social Sciences (MSHS), University of Poitiers, France [**certificate of attendance**].
- 2022 “Introduction to Natural Language Processing”, course offered as part of the Master “Digital Humanities” of the PSL University (Paris Sciences & Letters) | ENC (National School of Charters) [**certificate of attendance**].

Scholarships and Awards

- 2023 – Travel Bursary ADHO of the DH2023 Conference, Graz (Austria) [[link](#)].
- 2021 – Funding of the PhD contract by the French Excellence Initiative (Idex), as part of the Institutes and Initiatives Programme of The Sorbonne University Alliance (ASU) (The Heritage Observatory – OPUS) [[link](#)].
- 2017 – 2018 Dositeja – Serbian Government scholarship (Fund for Young Talents of the Republic of Serbia) for the best Master’s students
- 2016 – 2017 Dositeja – Serbian Government scholarship (Fund for Young Talents of the Republic of Serbia) for the best Bachelor’s students
- 2016 Dean’s Honor. Mention for Outstanding academic achievement, University of Belgrade (Serbia), Faculty of Philology
- 2014 – 2016 Serbian Government scholarship (Ministry of Education, Science and Technological Development) for the Bachelor’s students
- 2014 Training certificate from the Center for Lifelong Learning and Training of the University of Ioannina (Center for Greek Language Education and Culture DI.K.E.P.P.E.E. “Stavros Niarchos”) – IKY scholarship for the Summer School of the Greek language and culture in Ioannina (Greece)

Skills

Informatics

- MS Office Word, Excel, Access, PowerPoint
- OS Windows, macOS, Linux

Languages

Script	Python (os, re, numpy, matplotlib, scipy, pandas, scikit-learn, nltk, tensorflow, pytorch, gensim, requests, spacy)..., R (stylo, ggplot2, knitr), Bash, Perl
